VALOR™

COLOCATION / CLOUD / CONNECTIVITY
BOISE, ID
10215 W EMERALD STREET

Located in the No.1 growth market in the U.S., this data center stands out with its state-of-the-art infrastructure and 24/7 support. ValorC3 guarantees the smooth operation of your mission-critical and compute-intensive applications, even in the most challenging conditions. Equipped with redundant power, cooling, network and security systems, ValorC3 ensures your uptime requirements are met with unwavering reliability.

Facility Highlights

» Purpose-built data center established in 2000, expanded in 2024

» 1MW critical load

» Cabinets, cages and private suites available

» Round-the-clock access with biometric security and video monitoring

» Tier III design by Uptime Institute

» Top U.S. growth market with competitive power rates

BOISE, ID

Building/Site

» 45,000 sq. ft. facility

» 13,500 sq. ft. raised-floor data hall space

» Client office areas and conference rooms

Power

» 46MW dedicated substation with 22MW redundant substation

» 2MW total power capacity

» N+1 redundant generators and UPS for backup power

» 2,700-gallon on-site fuel tank for 48+ hours of run time

Cooling

» N+1 redundant 177-ton precision cooling units

» Hot/cold aisle configuration for energy efficiency

Security

» On-site technical staff 24/7/365

» Secure staging areas and workspaces

» Redundant security systems

Connectivity

» Carrier-neutral facility, multiple fiber paths: CenturyLink, Zayo, Syringa, Level3, Cogent and Comcast

» Multiple cloud on-ramps

» Secondary network entry point for path redundancy

Fire Protection

» Dual-interlock pre-action dry pipe fire suppression system

VALOR

ValorC3 is a modern data center, cloud and connectivity partner that delivers agile, scalable IT solutions tailored to the relentless mid-market enterprise. Valor meets clients where they're at and gets them where they need to grow, helping them navigate the rapidly changing digital landscape with flexible, high-density data centers, extensive infrastructure expansion capabilities, low latency networks, strong partnerships and decades of industry expertise.
