

COLOCATION / CLOUD / CONNECTIVITY

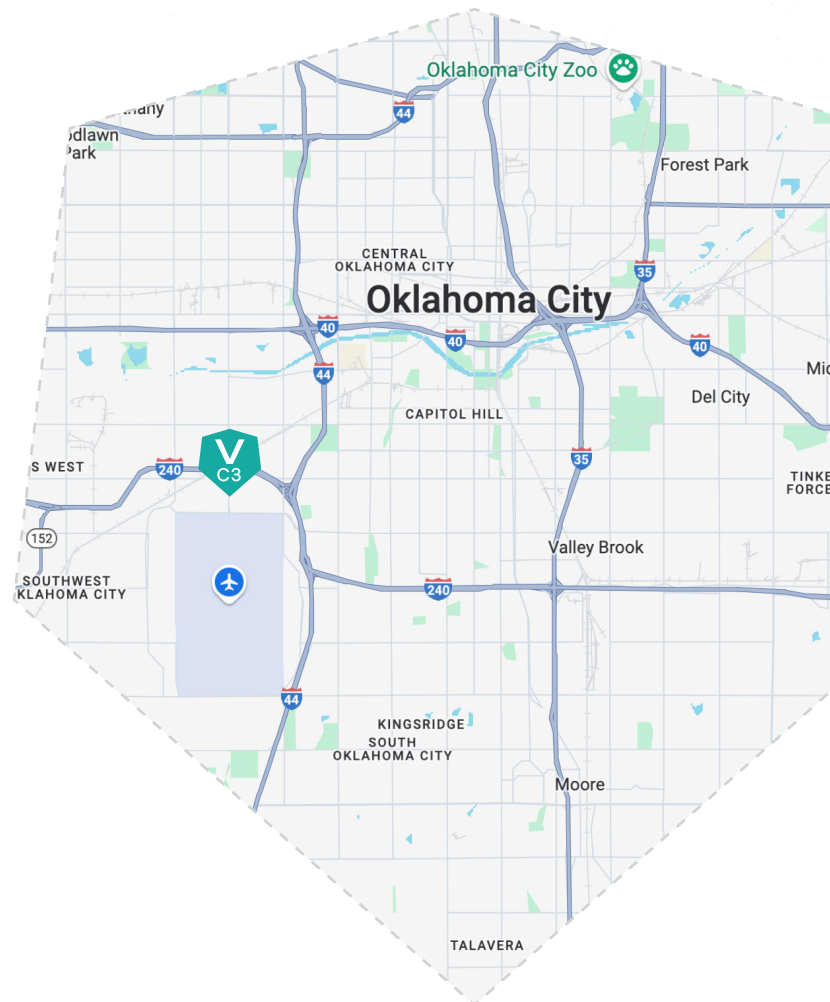

# OKLAHOMA CITY, OK

4442 NEWCASTLE ROAD

ValorC3's Oklahoma City Data Center provides high-density capacity and geographic optionality for all client workload types. Located near the Will Rogers World Airport in Oklahoma City, and conveniently accessible to the nearby Dallas-Fort Worth metro area on a highly secure four-acre campus, this purpose-built Tier III data center is positioned for 100% uptime and can withstand tornado-force winds up to 310 mph.

## Facility Highlights

- » Purpose-built data center, updated and recommissioned in 2024
- » Ideal central U.S. location, proximate to Tier I Dallas-Fort Worth metro area
- » 5MW critical load (expandable to 10MW with new substation)
- » Chilled-water cooling for high-density workloads
- » Built to withstand 310 mph winds
- » Concurrently maintainable Tier III design
- » 24/7/365 secure access, video surveillance and on-site personnel
- » Excellent market with economic incentives, competitive power rates and high growth

# OKLAHOMA CITY, OK

## Building/Site

- » 64,942 sq. ft. facility on four acres
- » 20,000 sq. ft. raised-floor data hall space
- » Designed to withstand F5 tornados, 310 mph winds, 250lbs per square foot

## Power

- » 8MW primary and secondary commercial power substations
- » Five 2,000kW diesel generators with housing for an additional unit
- » Five Schneider Electric Galaxy VX 1250 kW UPS systems
- » Fuel storage with a minimum 48-hour run time, two 15,000-gallon on-site tanks

## Cooling

- » Three 350-ton water-cooled chillers
- » Two 370-ton air-cooled chillers
- » 20 CRAH units
- » Three cooling towers
- » CDUs with in-row coolers

## Security

- » Secure storage, shipping and receiving
- » 24/7/365 secure access
- » Video surveillance and on-site personnel
- » Fully fenced with restricted access

## Connectivity

- » Carrier-neutral facility, multiple fiber paths: AT&T, Verizon, Cox, Dobson
- » Multiple cloud on-ramps
- » Separate telecom entry points for path diversity

## Fire Protection

- » Dual-interlock pre-action dry pipe fire suppression system

ValorC3 is a modern data center, cloud and connectivity partner that delivers agile, scalable IT solutions tailored to the relentless mid-market enterprise. Valor meets clients where they're at and gets them where they need to grow, helping them navigate the rapidly changing digital landscape with flexible, high-density data centers, extensive infrastructure expansion capabilities, low latency networks, strong partnerships and decades of industry expertise.
